EXPERIENCE

I have engaged in numerous projects during my academic tenure, honing my skills across various technologies. Notably, my largest project in .NET Framework involved over ten thousand lines of code in C#, utilizing Razor pages for dynamic web development. Additionally, I've completed projects spanning Java, Python, web technologies, and database design as part of my coursework, contributing to a diverse skill set. Complementing my academic pursuits, I actively pursue online courses to further my aspiration as a full-stack developer.

EDUCATION

Gustav Adolf Grammar School (Gymnasium)

Sep 2017 — Jun 2020

Bachelors in Systems Development at Tallinn University of Technology (TalTech)

Finishing 2/3 course

COMMUNICATION

Proficient in both Estonian and English at a native speaker level, I excel in effective communication across diverse contexts. My experience as a military communication specialist during conscription has honed my ability to interact seamlessly with individuals from various backgrounds.

MOTIVATION

While my professional journey is in its early stages, my enthusiasm to learn and adapt is boundless. I may not have job experience yet, but I am eager to embrace new technologies and continuously refine my skills. I believe that every project is an opportunity for growth and mastery. I aspire to become a skilled Full Stack Developer. My goal is to master the entire software development stack, crafting seamless user interfaces and optimizing back-end functionalities.
